Nine months ended September 30, 2023 and 2022
(Unaudited – Expressed in Canadian Dollar)

1. NATURE AND CONTINUANCE OF OPERATIONS

C2C Gold Corp. (the “Company”) was incorporated on July 19, 1999, under the laws of the province of British Columbia, Canada, and its principal activity is acquisition and exploration of mineral properties in Canada. The principal address of the Company is at 1771 Robson Street – 1221, Vancouver, British Columbia, Canada.

The Company is a reporting issuer in the provinces of Alberta and British Columbia. Effective November 25, 2020, reflecting the Company’s new focus in Newfoundland, the Company changed its name from Taku Gold Corp. to C2C Gold Corp. The Company is currently trading under its new name and ticker symbol “CTOC” (formerly “TAK”) on the Canadian Securities Exchange (“CSE”).

C2C Nuclear Inc. (the “Subsidiary”) is a wholly owned subsidiary of the Company, was incorporated on September 8, 2023, under the laws of the State of Colorado, United States (“US”), and its principal activity is to hold mineral claims in the US on behalf of the Company.

The Company has no source of operating cash flow and operations to date have been funded primarily from the issue of share capital. As at September 30, 2023, the Company had an accumulated deficit of \$24,100,559 (December 31, 2022 - \$21,634,135) and incurred a net loss and comprehensive loss for the nine-month period of \$2,466,424 (2022 - \$949,407). As at September 30, 2023, the Company has a working capital of \$112,694 (December 31, 2022 - working capital deficiency of \$91,929).

The Company is an exploration stage company focused on the acquisition and exploration of mineral properties in Canada and has not yet determined the existence of economically recoverable reserves. The recoverability of the amounts shown for interests in mineral properties is dependent upon the discovery of economically recoverable reserves or proceeds from the disposition thereof, confirmation of the Company’s interest in the underlying mineral claims, the ability of the Company to obtain financing to complete development of the properties and on future profitable operations. The Company’s continued operations are dependent on its ability to raise additional funding from equity financings, loans, or other arrangements. There is no assurance that future financing activities will be successful. These conditions give rise to a material uncertainty, which casts significant doubt on the Company’s ability to continue as a going concern, and therefore, its ability to realize its assets and discharge its liabilities in the ordinary course of operations. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption not appropriate. Such adjustments could be material.

2. SIGNIFICANT ACCOUNTING POLICIES

a. Basis of presentation

The Company and its wholly owned subsidiary are consolidated in these Consolidated Condensed Interim Financial Statements. These consolidated condensed interim financial statements have been prepared in accordance with the International Accounting Standards (“IAS”) 34, Interim Financial Reporting, using accounting policies consistent with the International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). The policies applied in these consolidated condensed interim financial statements are based on IFRS issued and effective as of September 30, 2023. The Board of Directors approved the condensed interim financial statements for issue on November 17, 2023.

b. Basis of measurement

These consolidated condensed interim financial statements have been prepared on the historical cost basis, except for certain financial instruments, which are measured at fair value, and are presented in Canadian dollars, which is the functional currency of the Company.

c. Significant accounting policies

These consolidated condensed interim financial statements follow the same accounting policies and methods of computation as the most recent audited annual financial statements of the Company for the year ended December 31, 2022. Accordingly, these consolidated condensed interim financial statements should be read in conjunction with the Company’s most recent annual audited financial statements.

d. Adoption of New Accounting Standards

The Company adopted various amendments to IFRS, which were effective for accounting periods beginning on or after January 1, 2023. These include amendments to *IAS 1* (Presentation of Financial Statements) and *IFRS Practice Statement 2* (Making Materiality Judgements), *IAS 8* (Definition of Accounting Estimates) and *IAS 12* (Deferred tax related to assets and liabilities arising from a single transaction). The impact of adoption was not significant to the Company’s condensed interim financial statements.

e. New and Amended Accounting Standards

The amendments to *IAS 1* clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period. This amendment is effective for annual reporting periods beginning on or after January 1, 2024. The Company does not expect the adoption of this amendment to have a material impact on its consolidated condensed interim financial statements.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of the Company's consolidated condensed interim financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the year of change, if the change affects that year only, or in the year of the change and in future years, if the change affects both.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed below:

Exploration and evaluation assets

The application of the Company's accounting policy for exploration and evaluation assets requires significant judgment in determining if a mineral property is impaired. The Company follows the guidance in IFRS 6 to determine when a mineral property is impaired. In making this judgement, the Company evaluates, among other factors, the results of exploration and evaluation activities to date and the Company's future plans to explore and evaluate the property.

Valuation of share-based payments

The Company uses the Black-Scholes option pricing model for valuation of share-based payments. Option pricing models require the input of subjective assumptions including expected price volatility, interest rate and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's earnings and equity reserves.

Going concern

The determination of the Company's ability to continue as a going concern requires significant judgement. Adjustments to the condensed interim financial statements are required if the going concern assumption proved inappropriate could be material.

4. ASSET ACQUISITION

On June 24, 2022, the Company and The Rock Gold Corp. entered into a share purchase agreement pursuant to which the Company acquired all of the issued and outstanding common shares of The Rock Gold Corp. in consideration of 12,250,000 shares of the Company.

The acquisition was accounted for as an acquisition of net assets and the consideration as a share-based transaction accounted for in accordance with IFRS 2 Share-based Payment. Significant judgement and estimates were required to determine the appropriate application of accounting treatment for the transaction and the transaction did not qualify as a business combination under IFRS 3 Business Combinations.

The allocation of the total consideration to the assets and liabilities acquired are as follows:

<u>Total consideration</u>	
Value of 12,250,000 common shares issued	\$ 1,592,500
Transaction costs	23,246
Total consideration	\$ 1,615,746

Tom Joe and Rocky Brook Properties

On May 20, 2021, the Company completed the acquisition of a 100% interest in the Tom Joe and Rocky Brook properties in the Central Newfoundland Gold Belt by paying \$25,000 cash (paid) and issuing 200,000 common shares (issued). The properties are subject to a 2.0% NSR royalty, of which the Company can purchase 1.0% at any time for \$500,000.

Jumpers Brook Property

On May 20, 2021, the Company completed the acquisition of a 100% interest in the Jumpers Brook property in the Central Newfoundland Gold Belt by paying \$65,000 cash (paid) and issuing 600,000 common shares (issued). The property is subject to a 2.0% NSR royalty, of which the Company can purchase 1.0% at any time for \$1,000,000.

Rocky Pond and Brunt Lake Properties

On May 20, 2021, the Company completed the acquisition of a 100% interest in the Rocky Pond and Brunt Lake properties in the Central Newfoundland Gold Belt by paying \$70,000 cash (paid) and issuing 700,000 common shares (issued). The properties are subject to a 2.0% NSR royalty, of which the Company can purchase 1.0% at any time for \$1,500,000.

Lake Douglas and South Tally Property

On July 22, 2021, the Company entered into an option and joint venture agreement (the “JV Agreement”) with Buchans Resources Limited (“Buchans”) whereby Buchans will grant the Company an option to acquire up to a 70% ownership interest in 364 mineral claims covering the Lake Douglas and South Tally properties (the “Properties”). Pursuant to the JV Agreement, the Company will exercise an initial option (the “First Option”) to earn a 51% ownership interest in the Properties by issuing 100,000 common shares (issued) to Buchans and incur exploration expenditures of \$1,500,000 over a four-year period. A joint venture is formed with the Company owning 51% and Buchans owning 49% upon completion of the First Option. If Buchans elects not to participate in the joint venture, the Company will have the right to exercise a second option to earn an additional 19% ownership interest by incurring additional exploration expenditures in the minimum of \$1,000,000 on the Properties on or prior to the date that is five years from the date of the JV Agreement. The JV Agreement also contains a provision that if a base-metal (not precious-metal) dominant area is identified, then Buchans would become the operator of this base metal joint venture with Buchans owning 70% and the Company owning 30%. Dilution of either party’s joint venture interest to below 10% will result in that party’s joint venture interest converting to a 2% NSR royalty, of which the majority joint venture interest owner can purchase 1% for \$1,500,000. The Company has not incurred the required minimum exploration expenditures, the option has been terminated and the Company has no interest in these properties effective on September 29, 2023.

During the period ended September 30, 2023, the Company recorded an impairment of \$440,560 in relation to the Lake Douglas and South Tally properties.

14. FINANCIAL INSTRUMENTS

Fair Value

Financial instruments include cash and any contract that give rise to a financial asset to one party and a financial liability or equity instrument to another party. The Company's cash and cash equivalents and accounts receivable are categorized as financial assets measured at amortized costs. Marketable securities are categorized as assets measured at fair value through profit and loss. Accounts payable and accrued liabilities, due to related party and advance are categorized as financial liabilities measured at amortized cost. The carrying amounts of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, due to related party and advance are considered to be reasonable approximations of their fair values due to the short-term nature of these instruments.

The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly;
and

Level 3 – Inputs that are not based on observable market data.

As at September 30, 2023 and December 31, 2022, the Company's marketable securities are based on level 1 inputs of the fair value hierarchy and the values are based on the closing trading price of the shares on public stock exchanges at the period-end date.

Financial Risk Management

Market risk

Market risk is the risk of loss that may arise from changes in market fluctuations such as those listed below. The fluctuations may be significant.

Foreign exchange risk

The Company operates mainly in Canada, but a small portion of the Company's financial assets and liabilities are denominated in US dollars. The Company does not undertake currency-hedging activities but continuously monitors its exposure to foreign exchange risk to determine if any mitigation strategies warrant consideration.

Credit risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and cash equivalents, accounts receivable and reclamation bonds. The Company has no significant concentration of credit risk arising from operations. Cash and cash equivalents consist of cash held in bank accounts and accounts receivable consist primarily of goods and services tax receivable from the government of Canada, for which management believes the risk of loss to be minimal. Reclamation bonds consist of term deposits and guaranteed investment certificates, which have been invested with a major Canadian financial institution, from which management believes the risk of loss to be minimal.

14. FINANCIAL INSTRUMENTS (CONTINUED)

Financial Risk Management (Continued)

Interest rate risk

Interest rate risk mainly arises from the Company's cash and cash equivalents, which receive interest based on market interest rates. Fluctuations in interest cash flows due to changes in market interest rates are not significant.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its current obligations as they become due. The Company prepares annual exploration and administrative budgets and monitors expenditures to manage short-term liquidity. Due to the nature of the Company's activities, funding for long-term liquidity needs is dependent on the Company's ability to obtain additional financing through various means, including equity financing. There can be no assurance that the Company will be able to obtain adequate financing or that the terms of such financing will be favorable. As at September 30, 2023, the Company has a working capital of \$112,694 (December 31, 2022 – working capital deficiency of \$91,929).

Price risk

The Company is exposed to price risk with respect to equity prices. Equity price risk is the risk of loss associated with movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements and the stock markets to determine appropriate actions to be taken by the Company. The Company has investments in certain publicly traded companies (marketable securities), and there can be no assurance that the Company can exit these positions if required, so there is a risk that proceeds may not approximate the carrying value of these investments.

As at September 30, 2023, a 10% fluctuation in the price of the Company's marketable securities would increase or decrease comprehensive loss by \$12,850 (December 31, 2022 - \$7,700).

Capital Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its mineral properties, acquire additional mineral property interests and to maintain a flexible capital structure that optimizes the costs of capital at an acceptable level of risk. In the management of capital, the Company includes components of shareholders' equity. The Company manages the capital structure and adjusts it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents and marketable securities.

The Company is not currently subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management during the nine-month period ended September 30, 2023 and 2022.
